What is Nutrition Response Testing?

Nutrition Response Testing is a non-invasive system of analyzing the body to determine the underlying causes of ill health. When these are corrected through safe, natural, nutritional means, the body can repair itself in order to attain and maintain more optimum health.

Nutrition Response Testing is very precise and scientific. However, if I were to analyze you using Nutrition Response Testing before it was explained to you, you might find it strange, or simply not believable – only because it is probably very different from anything you may have experienced before.

I can understand this because when I first saw this type of work being done, my first reaction was “Hmm, what is this strange stuff?” No one was more skeptical than I was. As a result, I studied Nutrition Response Testing extensively to see if it was for real. And I am sure happy I did because it has greatly helped me improve my health and the health of so many clients.

In Nutrition Response Testing we do not diagnose or treat disease. There are two parts to the process: the **analysis (the assessment of your body’s current health status)** and the **personalized health improvement program (using designed clinical nutrition)**.

First the Analysis.

The analysis is done through testing the body’s own neurological reflexes and certain acupuncture points.

Nutrition Response Testing analyzes the different points and areas on the surface of the body that relate to the state of health and to the flow of energy in each and every organ and function of the body.

Each Nutrition Response Testing reflex represents a specific organ, tissue, or function, and indicates the effect that energy, or the lack of energy, is having on the body. By testing the Nutrition Response Testing reflexes, we have a system of monitoring your body at each visit that has proven to be extremely accurate clinically, and that helps us identify exactly what the body needs and how well we are meeting that need.

How Do We Do The Nutrition Response Testing Analysis?

If I were to hook you up to an electro-cardiograph machine and take a reading, that would make perfect sense to you, right?

What is actually happening during this procedure? Electrical energy from the heart is running over the wires. This electrical energy makes the electrocardiograph record the energy pattern in the form of a graph or chart. I could then study this graph and tell you what it all means.

Here is what we do with Nutrition Response Testing. Instead of connecting electrodes to the reflex areas being tested, the Nutrition Response Testing practitioner contacts these areas with their own hand. With the other hand, he/she will test the muscle of your extended arm. If the reflex being contacted is “active” the nervous system will respond by reducing energy to the extended arm, and the arm will weaken and drop. This drop signifies underlying stress or dysfunction, which can be affecting your health.

The “Personalized Health Improvement Program”.

Our next step is to test specific, time-tested and proven, highest-possible quality nutritional formulas against those weak areas, to find which ones bring the reflexes back to strength.

A highly personalized nutritional supplement schedule is designed to correct the underlying deficiency or imbalance that caused the reflex to be active in the first place. By following the program as precisely as possible, you are well on your way to restoring normal function and improving your health.

It’s that simple!

SUMMARY

1. Through an analysis of your body’s reflexes, we help you to determine the exact nutrients you need to supplement your diet, in order to bring about balance and better health.
2. We make these highly concentrated therapeutic formulations available to you in tablets, capsules, or in powdered form to “supplement” your current diet. That’s why they are called “food supplements.”
3. Depending on your individual situation, we might also require that you make some specific changes in your diet and eating habits, and in your routines, in order to bring about the best possible results.

Is it Possible to Restore Your Health?

Many people I see in my practice have eaten themselves into their current state of ill-health, to one degree or another. The deficiencies or imbalances lead to a breakdown in resistance, or immunity, and a loss of the ability to cope with environmental stresses (chemical, microscopic, or otherwise).

So, yes, the **good news** is that it is possible to reverse the process!

What could be more natural? What could be more correct? Each cell, tissue, and organ in your body is in the process of replacing itself every day, month, and year. The health of each organ is dependent on making the correct nutrients available to upgrade or to maintain the health of the body at a cellular level.

In the end you are the one responsible for your own condition. And with our guidance, we feel that – if you are a Nutrition Response Testing case – your chances of greatly improving your health can be as high as 90% or better.
